SOHAM RANE

AI/ML Engineer

ranesoham007@gmail.com +91 8450907579 Thane Maharashtra

sohamrane10.github.io/My-Portfolio/ 07-06-2004

SUMMARY

AI/ML Engineer specializing in scalable machine learning systems and secure full-stack applications, with hands-on experience in LLM integration, RAG pipelines, and LangChain-based architectures. Strong expertise in NLP, computer vision, model optimization, and cloud deployment, building production-grade, data-driven AI systems.

EXPERIENCE

AI-ML Intern (On-Site), Ross Warner HR Solutions 12/2025 – 02/2026
Vikhroli, Mumbai

- Developed NLP pipelines and inference workflows, implemented database integrations and structured logging systems to automate tasks, enhance data processing, and improve data tracking.
- Assisted in AI model development for client recruitment processes, conducted research on AI trends and best practices for HR solutions, and collaborated on candidate data analysis to refine selection criteria and increase selection efficiency.

Python Developer Intern (Hybrid), CodeSprint Technologies 06/2024 – 08/2024
Thane, Maharashtra

- Developed modular GUI applications using Tkinter with API integrations, while implementing structured exception handling and reusable architecture patterns to enhance user interaction and improve code reliability.

EDUCATION

B.E - Artificial Intelligence & Data Science, 05/2026
Datta Meghe College of Engineering - Mumbai University

Class XII (HSC) - Science (PCM-CS), 03/2022
People's Education Society Thane - Thane

Class X (SSC) - CBSE, New Horizon Public School Navi Mumbai 03/2020

SKILLS

Languages — Python, R, C++, Prolog | **Frameworks** — Flask, Django, React, Node, Flutter | **AI** — Machine learning, NLP, DL | **REST APIs, JWT authentication** | **Database** — MySQL, MongoDB, PostgreSQL, Firebase | **Data Visualization** — Tableau, PowerBI, Looker | **Tools** — Git, Docker, Azure | **Deployment** — Github, Render, Vercel

PROJECTS

DDoS Attack Detection, Classification & Mitigation System , **Cybersecurity - AI**
ML-based intrusion detection system for real-time traffic monitoring and multi-class attack classification. Implemented anomaly detection pipelines and automated mitigation workflows.

PlantLensAI - Plant Disease Detection , **TensorFlow, React**
Built deep learning CNN model for plant disease classification. Developed interactive web interface for real-time prediction.

NexusRAG - Intelligence, RAG, Langchain + LLM Integration
NexusRAG is a full-stack multi-persona RAG platform using FastAPI and React, leveraging LangChain for dynamic PDF ingestion with HuggingFace embeddings and FAISS vector search, powered by Groq LPU inference running Llama-3 LLMs.

CERTIFICATIONS

Applied AI - University of Michighan
08/2026 - Coursera

Docker Professional Certificate
08/2026 - LinkedIn Learning

Machine Learning Specialization - Stanford University
09/2024 - Coursera

WEBSITES, PORTFOLIOS, PROFILES

Github

Google Dev

Leetcode

CodeChef

ACCOMPLISHMENTS

Techvanza'26 Hackathon, 3rd Place (Team Lead)	01/2026
Code-a-thon'26 Hackathon, Finalist	02/2026
Milestone'26 Football, Best Goal Scorer	02/2026
Sportsmania'26 VIT Football, Runner-Up	02/2026

ACHIEVEMENTS LEADERSHIP

Trained with Thane City FC, College Football

Participant, Smart India Hackathon, Logithon, Quasar

Milestone'26 Football Event Head
